Hazardous Weather

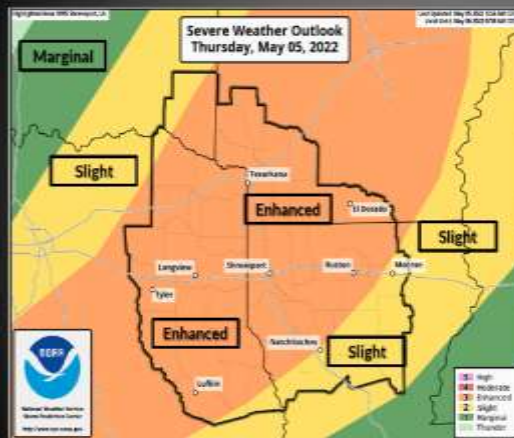

Hazardous Weather

Severe Weather Risk – Today Through This Evening

Valid through Thu 7:00 AM CDT Friday

Weather Forecast Office
Shreveport, LA
Issued May 5, 2022 3:33 AM CDT

Highest Risk: Enhanced Risk
Timing: Mid-morning today through this evening

Hazard	Impacts
Tornado Potential	Low
Damaging Winds	Up to 75 mph
Max. Hail Size	Quarter-sized (1")
Heavy Rain/Flooding	Slight; Localized flooding possible

NWSShreveport

weather.gov/shv

An Enhanced Risk for severe thunderstorms remains in place across much of the region today. The threat for severe thunderstorms will increase from mid-morning and continue into the evening. Damaging winds, hail, isolated tornadoes, and locally heavy rainfall/minor flooding are all possible.

Wind Advisory

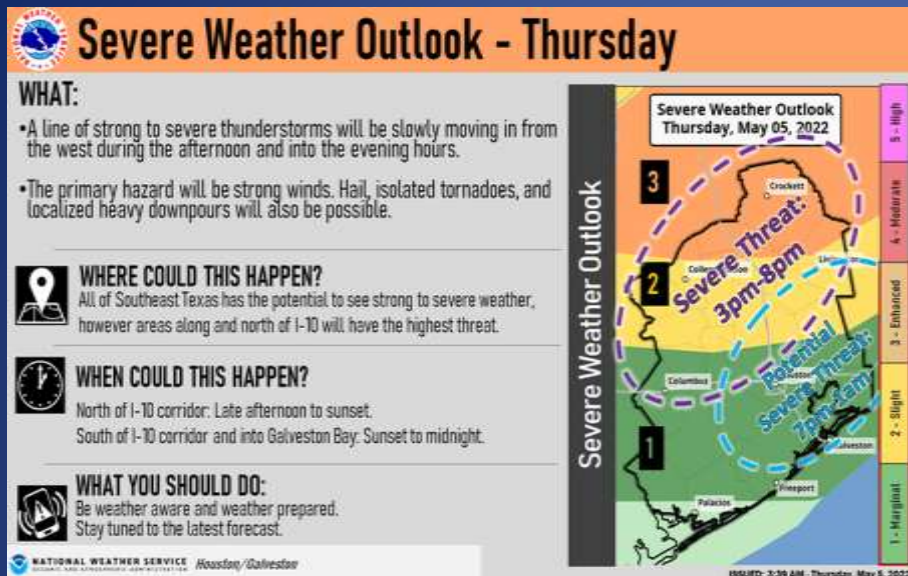

From 11 A.M. to 5 P.M.

Weather Forecast Office
Lake Charles, LA
Issued May 05, 2022 7:45 AM CDT

Winds will gradually increase and become gusty as we head for max heating for the day.

Hazardous Weather

A line of strong to severe thunderstorms will move through the area during the late afternoon to overnight hours. Damaging winds will be the main hazard, but all severe weather types will be possible.

An upper level disturbance and associated frontal boundary will move into Central Texas late this morning and bring a focus for strong to severe storms over the eastern two-thirds of South Central Texas through the remainder of the afternoon. Large hail, damaging winds, and isolated tornadoes are possible. Areas generally north of I-10 may also see a threat for locally heavy rainfall.

Hazardous Weather

There is a Marginal (level 1 of 5) to Slight (level 2 of 5) risk of severe storms late this afternoon and evening across central and eastern portions of the area. The primary threats are for damaging winds and large hail. However, locally heavy rainfall and isolated tornadoes are also possible.
